Speed, precision  
& design

# Meet the **i-mop XXL**®

---

Sometimes bigger can be better. The i-team proudly presents the new i-mop XXL: a re-engineered powerhouse that literally runs circles around the competition. With a larger scrub deck & new power management system, large obstructed areas become possibilities. This innovation allows the user to clean up to 2300 m<sup>2</sup> in just an hour, flipping the script on how a larger auto scrubber should look, feel & handle. Start saving tremendous time when operating the machine, and cut down time on logistics on your larger workspaces. You can approximately save 20% of your time compared to a conventional walk-behind auto scrubber with a size of 50 to 75cm. Empower yourself with the i-mop XXL, where powerful innovation meets flexible design.

## Full size scrubber dryer with the flexibility of a flat mop

## scrub & dry

- 62 cm cleaning path
- 2 powerful brush motors
- Nylon protective bumper
- Cleans right up to the edge

## extreme mobility

- Low profile deck to clean underneath objects
- 360° of flexibility

## click on / click off

- Easy to fill, clean & empty above a sink
- Use different tanks for different chemicals
- Reduce unproductive refill waiting time by prepping in advance according to HACCP standards

## battery charge

- Quick exchange
- 2 sets = 24/7 power
- Runs on i-power 14 batteries

## easy transport

- Transport wheels
- Fits in the trunk of a car
- Easy to store & carry upstairs
- 100% mobility

7cm

62cm

Low profile deck

Think outside the box

24/7 energy

## Friendly user-experience

---

With the i-mop XXL, users operate a machine that not only looks & feels right, but also twists and turns like no other scrubber dryer on the market. It's friendly exterior & usability makes it the perfect addition to your workforce.

### **New power management**

We have redesigned the power management system and packed in as much power as physically possible into our new grey i-power 14 batteries.

They are the exact same shape & size as our i-mop XL batteries. You can use them across all of our products, simply plug and play.

### Re-engineered for width

In order to achieve the balance between challenging larger areas with the same flexibility and speed as the i-mop XL. We have enlarged the scrub-deck to give the machine a cleaning path of 62 cm and added more water capacity.

### Lightweight & storage

The i-mop XXL has been designed in such a way that it takes up very little floor space when it's not being used. Store it in a closet within reach. Take it with you up and down steps and stairs. Pop off the batteries and lift the water tank from the machine to load it into the trunk of a car. In short, a fully mobile machine.

### Total cost of ownership

No new training needed. The i-mop XXL combines all of the elements of the previous build, and upgrades you to work in bigger unobstructed areas. By expanding the range of your machines, the way you operate is in your own hands, without the unnecessary extra overhead.

## Technical specifications

|                                  |                                     |
|----------------------------------|-------------------------------------|
| Application                      | Indoor, hard surfaces only          |
| Theoretical performance          | Up to 2300 m <sup>2</sup> per hour  |
| Practical performance            | 1200 - 1800 m <sup>2</sup> per hour |
| Brush speed                      | 350 RPM                             |
| Brush pressure                   | 32 kg                               |
| Operation width                  | 62 cm                               |
| Size machine (l x w x h)         | 43 x 69 x 124 cm                    |
| Weight without batteries & water | 21 kg                               |
| Clean water tank                 | 5 L                                 |
| Recovery clean tank              | 5 L (max 8 L)                       |
| Material                         | PP, Aluminum alloy                  |
| Power source                     | 2 i-power 14 batteries*             |
| Battery spec                     | 25.2 V, 14 Ah                       |
| Run time                         | 60 minutes                          |
| Charger type                     | Off-board                           |
| Charger                          | 110-240V, 50/60Hz                   |

# Our bright future **together**

663,000,000 people don't have access to clean drinking water.  
Together with Made Blue we wanted to do something about this.

Let's jump into some details!

## **Saving water all over the world.**

By operating i-mops, your partners, clients and users lower the water footprint whilst contributing positively to the availability of water in the world.

## **Clean water & charity projects**

Made Blue measures the total water used or saved by products or services and ensures that same amount to be made available elsewhere. Water projects are implemented by international charity organisations such as Red Cross and Amref Flying Doctors.

## **Join the i-team**

Innovation & caring about the environment should go hand in hand. Join us in making the world a better place, for now and the future. For more information, visit: [i-teamglobal.com](http://i-teamglobal.com)

## **Water conservation**

The i-mop was designed to change the process of cleaning, and has done so in two ways: creating a revolutionary device that increases cleanliness, and also saving water usage for the user, the company, and the planet.

## **Donate**

By now Made Blue has realized over 1.5 billion litres of clean water in developing countries, enough to serve over one hundred thousand people every year.

## **Made Blue family**

Being a part of the i-team, means being a part of the Made Blue family. We encourage all of our employees to tell the story, and inform everyone about Made Blue.
